PROJECTS

Chatt-Application

Frontend: React.js for building the user interface, with Socket.io for real-time communication.

Backend:Node.js with Express.js for creating the server-side application, integrated with Socket.io for WebSocket support and MongoDB for storing user data and chat messages.

Authentication: JWT (JSON Web Tokens) for user authentication and authorization, ensuring secure access to the application.

Typing-speed Game

Randomized Text: Each game session presents a new set of random text to type, ensuring a fresh challenge every time.

Timer and Score Tracking: Track your progress with a countdown timer and real-time score updates for speed and accuracy.

Responsive Design: Play the game on any device, including desktops, laptops, tablets, and smartphones, with a responsive and user-friendly.

Some Minor projects

Plane-Shooting-Game(html,css,js)

Ludo-Game(html,css,js)
